EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Aly Dossa L0031 on January 19, 2007.

The application has been amended as follows:

IN THE CLAIMS:

Claim 3. (Currently Amended) The device according to ~~claims 1 or~~ claim 2, wherein the at least one integrated circuit card includes a second non volatile memory including data specific to the service.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: The prior art does not disclose nor render obvious the limitations of the claim 1. Specifically, claim 1 requires the presence of an initially stored command in the integrated circuit card, where the command is part of a sequence of commands, the sequence of commands is associated with a single application. When the next command is not found on the card, a server is queried and loads the integrated circuit card with the next command. The closest prior art, Chew (US 5,901,303), only initially includes a downloading program used to obtain an entire function rather than part of a sequence of commands.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Philip J. Chea whose telephone number is 571-272-3951. The examiner can normally be reached on M-F 6:30-4:00 (1st Friday Off).
